

PSGR
Krishnammal College for Women

DEPARTMENT OF MATHEMATICS (AIDED)

**CHOICE BASED CREDIT SYSTEM (CBCS) & LEARNING OUTCOME-
BASED CURRICULUM FRAMEWORK (LOCF)**

BACHELOR OF MATHEMATICS (B.Sc Mathematics)

2023 - 2026

Department of Mathematics
Programme: B.Sc. Mathematics (AIDED)
2023 Batch and Onwards

Programme Educational Objectives

Program Educational Objectives of **B.Sc. Mathematics** Programme is to enable the students to possess the following knowledge and skills

1. Mathematical knowledge

- ❖ The ability to demonstrate an understanding of the foundations of calculus, analysis and linear algebra as well as the ability to think logically and critically.
- ❖ The ability to explore the new emerging areas of science and engineering like Nonlinear Dynamics, Computational Mathematics and Cryptography.
- ❖ The ability to abstract general principles from examples.

2. Problem solving skills

- ❖ The ability to formulate, analyses, and solve problems through analytical and computational techniques and apply them to other disciplines when appropriate.
- ❖ The ability to plan, analyse and investigate industrial and societal problems using simulation tools and scientific computing

3. Research skills

- ❖ The ability to search for, locate, extract, organise, evaluate and use or present information that is relevant to a particular topic.
- ❖ The ability to carry out interdisciplinary research among the various basic sciences and engineering disciplines

4. Communication skills

- ❖ The ability to Display competence in oral, written, and visual communication with the help of relevant current technology.

5. IT skills

- ❖ The ability to acquire necessary computer skills and knowledge to excel in their professional career in related disciplines.

6. Employable skills

- ❖ The ability to translate their degree into a viable career path with the using their mathematical and statistical skills
- ❖ The ability to become leaders in their associated organization with team building and managing capabilities

Department of Mathematics

Programme: B.Sc. Mathematics (AIDED)

Programme Learning Outcomes

B.Sc. Mathematics will enable the students to be successful in

- A career that uses Mathematics in business, industry or government
- Teaching Mathematics at all levels
- Carrying out research in Mathematics or fields related to Mathematics.
- Competitive examinations like GATE, GRE, SET/NET, TNPSC, UPSC etc.

On the successful completion of the Programme, the following are the expected outcomes.

PLO Number	PLO Statement
PLO1.	Disciplinary Knowledge - Capability of demonstrating comprehensive knowledge of mathematics and understanding of one or more discipline.
PLO2.	Communication Skills - Ability to use mathematics as a precise language of communication in other branches of human knowledge
PLO3.	Critical thinking and analytical reasoning - Ability to employ critical thinking, analyze the results and apply them in various problems appearing in different branches of mathematics.
PLO4.	Information/digital literacy - Capability to use appropriate software's to mathematical investigations and problem solving
PLO5.	Self-directed learning: Ability to work independently and do in-depth study of various notions of mathematics.
PLO6.	Problem solving: -. Capability to solve various models such as growth and decay models, radioactive decay model, drug assimilation, LCR circuits and population network flow problems and to provide new solutions using the domain knowledge of mathematics acquired during this programme.
PLO7.	Lifelong learning: Ability to think, acquire knowledge and skills through logical reasoning and to inculcate the habit of self-learning.

DEPARTMENT OF MATHEMATICS (AIDED)
CHOICE BASED CREDIT SYSTEM (CBCS) & LEARNING OUTCOME- BASED
CURRICULUM FRAMEWORK (LOCF)

SYLLABUS AND SCHEME OF EXAMINATIONS – I & II SEMESTER
2023 Batch and Onwards

Semester	Part	Subject Code	Title of the Paper		Instruction hours per week	Contact Hours	Tutorial Hours	Duration of Examination (in hours)	Examination Marks			Credits

ACE – Ability Enhancing Course

AECC- Ability Enhancement Compulsory Course

E- English

CA – Continuous Assessment

ESE – End Semester Examination

SEC - Skill Enhancement Course

- Self Study

UG- Core and Allied - (First 3 Units)

CA Question from each unit comprising of

One question with a weightage of 2Marks

: $2 \times 3 = 6$

One question with a weightage of 5 Marks (Internal Choice at the same CLO level) : $5 \times 3 = 15$

One question with a weightage of 8 Marks (Internal Choice at the same CLO level) : $8 \times 3 = 24$

Total:45Marks

ESE Question Paper Pattern : $5 \times 15 = 75$ Marks

Question from each unit comprising of

One question with a weightage of 2Marks

: $2 \times 5 = 10$

One question with a weightage of 5 Marks (Internal Choice at the same CLO level): $5 \times 5 = 25$

One question with a weightage of 8 Marks (Internal Choice at the same CLO level): $8 \times 5 = 40$

Total:75Marks

CIA components for 2023-26 Batch with CIA: ESE pattern 25:75 Marks

INTERNAL COMPONENT MARKS:

CIA Test	:	5 marks (conducted for 45marks after 50 days)
		7 marks (conducted for 75 marks after 85days (Each Unit 15 Marks))
Model Exam	:	5 marks
Seminar/Assignment/Quiz	:	5 marks
Class Participation	:	5marks
Attendance	:	3 marks
Total	:	25 Marks

RUBRICS

Assignment/ Seminar

Maximum - 20 Marks (converted to 4 marks)

Criteria	4 Marks	3 Marks	2 Marks	1 Mark
Focus	Clear	Shows awareness	Shows little awareness	No awareness
Purpose				

Main idea	Clearly presents a main idea.	Main idea supported throughout	Vague sense	No main idea
Organisation: Overall	Well planned	Good over all organization	There is a sense of organization	No sense of organization
Content	Exceptionally well presented	Well presented	Content is sound	Not good
Style: Details and Examples	Large amounts of specific examples and detailed description	Some use of examples and detailed descriptions	Little use of specific examples and details	No use of examples

CLASS PARTICIPATION

Maximum - 20 Marks (converted to 5 marks)

Criteria	5 Marks	4 Marks	3 Marks	2 Marks	1 Mark	Points scored
Level of Engagement in Class	Student proactively contributes to class by offering ideas and asks questions more than once per class.	Student proactively contributes to class by offering ideas and asks questions once per class	Student contributes to class and asks questions occasionally	Student rarely contributes to class by offering ideas and asking no questions	Student never contributes to class by offering ideas	
Listening Skills	Student listens when others talk, both in groups and in class. Student incorporates or builds off of the ideas of others.	Student listens when others talk, both in groups and in class.	Student listens when others talk in groups and in class occasionally	Student does not listen when others talk, both in groups and in class.	Student does not listen when others talk, both in groups and in class. Student often interrupts	

					when others speak.	
Behavior	Student almost never displays disruptive behavior during class	Student rarely displays disruptive behavior during class	Student occasionally displays disruptive behavior during class	Student often displays disruptive behavior during class	Student almost always displays disruptive behavior during class	
Preparation	Student is almost always prepared for class with required class materials	Student is usually prepared for class with required class materials	Student is occasionally prepared for class with required class materials	Student is rarely prepared for class with required class materials	Student is almost never prepared for class.

		Theory	73	2	-	4

Preamble

- To provide fundamentals of differentiation and integration and show their significant role in physical, economical and industrial world

Prerequisite

Knowledge of limits, Differential derivatives and related formulas

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1.	Recall the basic concepts of calculus, curvature, evolutes, envelopes and asymptotes	K1
CLO2.	Understand and translate integrals of physical problems	K2
CLO3.	Apply and solve physical problems using Laplace Transform	K3
CLO4.	Analyse special functions like Beta and Gamma to evaluate multiple integrals	K4

S- Strong; M-Medium; L-Low

Syllabus

SEMESTER I

CORE I - Advanced Calculus with SCILAB

Credits : 4

Hours: 73

Subject Code: TH23C01

UNIT I

14 hrs

Total differentiation – Euler’s theorem on homogeneous functions - Curvature – Radius of curvature in Cartesian and polar forms – Evolutes and envelopes – Pedal equations- linear asymptotes.

UNIT II**15 hrs**

Multiple integrals- Definition- Change of order of integration in double integral – change of variables in double & triple integrals - Applications to calculations of areas and volumes – Surface areas – Areas in polar coordinates - Jacobians.

UNIT III**14 hrs**

Beta and Gamma integrals – their properties & relation between them - simple problems – Applications of Gamma functions to multiple integrals.

UNIT IV**15 hrs**

Laplace Transform – Introduction - Definition- working rule - Piecewise continuous function- functions of exponential order and class-sufficient condition for the existence-Linearity property –some elementary functions-first shifting theorems- unit step functions-Second shifting theorem-change of scale property-derivatives –multiplication by positive integral powers of t derivatives-Division by t theorems- Laplace transforms of integrals-Initial value and final value theorem-Periodic functions-Evaluation of integrals.

UNIT V**15 hrs**

Inverse Laplace transforms - Introduction-Definition - Null function definition- Uniqueness of inverse Laplace transforms-Some elementary functions-Linearity property-method of partial fractions-Heaviside expansions theorems- First translation-Second translation theorem-Change of scale property-Inverse Laplace transforms of derivatives and integrals.

COURSE CODE TH23C02	COURSE NAME CORE II DIFFERENTIAL EQUATIONS AND VECTOR ANALYSIS WITH SCILAB SEMESTER I	Category	L	T	P	Credit
		Theory	73	2	-	4

Preamble

- To learn the basics of differential equations and various techniques of solving differential equations
- To expose the practical applications of differential equations and introduce students to the fundamentals of vector calculus
- To show that differential equations and vector analysis are powerful tools in solving problems of physical, social and managerial sciences.

Prerequisite

- Understanding of the concepts of a function and the relationship between a function and its graph
- Understanding of differential derivatives (ordinary and partial) ➤ Knowledge of Functions and angles, Vector Algebra

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1.	Recall the fundamental concepts of differential equations and vector their role in modern Mathematics.	K1 Analysis and
CLO2.	Understand the efficient use of techniques in solving differential vector differential operators	K2 equations and applying
CLO3.	Apply the problem solving techniques of differential equations and vector analysis in diverse situations of Physics, Engineering and other mathematical contexts	K3
CL04.	Analyse the use and applications of differential equations and/or vector calculus to some topic related to undergraduate study, employment or other experience.	K4

Syllabus

SEMESTER I - CORE II
DIFFERENTIAL EQUATIONS AND VECTOR ANALYSIS WITH SCILAB

Credits: 4**Hours: 73****Subject Code: TH23C02****UNIT I****15hrs**

Solution of Differential Equations of the first order and First Degree – Linear Equations with Constant Co-efficient – Application to Geometry and Mechanics. Solving simple problems using SciLab.

UNIT II**15 hrs**

Homogeneous Linear Equations – Trajectories - Equations of the First Order but not of the First Degree. Solving simple problems using SciLab.

UNIT III**14 hrs**

Linear Equations of Second Order – Simultaneous Differential Equations. Solving simple problems using SciLab.

UNIT IV**15hrs**

Vector-Valued Functions, Vector Fields: An Introduction, Gradient, Divergence, Curl, and the Del Operator

UNIT V**14hrs**

Line integrals, Surface integrals, Volume integrals using Integral theorems.

COURSE CODE TH23A01	COURSE NAME ALLIED - MATHEMATICAL STATISTICS – I WITH R SEMESTER I	Category	L	T	P	Credit 5
		Theory	88	2	-	

Preamble

- To introduce the basic statistical concepts and help the students to know the need for statistics and statistical analysis.
- To describe the types of data and to discuss random variables and their distributions.

Prerequisite

Knowledge of population, sample, events and outcome.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1.	Recall the basic concepts of Set theory and Probability Distributions	K1
CLO2.	Understand and formulate questions that can be addressed with data and collect, organize, and display relevant data to answer them.	K2
CLO3.	Apply & evaluate the design, including sampling techniques of a statistical study	K3
CLO4.	Analyze statistical software R to perform statistical computations and display numerical and graphical summaries of data sets	K4

Syllabus

SEMESTER I – ALLIED I

ALLIED – MATHEMATICAL STATISTICS – I WITH R

Credits : 5

Hours: 88

Subject Code : TH23A01

UNIT I

18 hrs

Probability and Distributions: Introduction - Set Theory -The Probability Set Function - Conditional Probability and Independence - Random Variables - Discrete Random Variables - Continuous Random Variables.

UNIT II**17 hrs**

Expectation of a Random Variable - Some Special Expectations – Important Inequalities. Multivariate Distributions: Distributions of Two Random Variables-Transformations: Bivariate Random Variables - Conditional Distributions and Expectations - Independent Random Variables - The Correlation Coefficient.

UNIT III**17 hrs**

Some Special Distributions: The Binomial and Related Distributions - The Poisson Distribution- The Normal Distribution - The Bivariate Normal Distribution.

UNIT IV**18 hrs**

Consistency and Limiting Distributions: Convergence in Probability- Convergence in Distribution - The Central Limit Theorem- Extensions to Multivariate Distributions.

UNIT V**18 hrs**

Optimal Tests of Hypotheses: Most Powerful Tests - Uniformly Most Powerful Tests - Likelihood Ratio Tests - The Sequential Probability Ratio Test.

SEMESTER – I - FOUNDATION COURSE
INTRODUCTION TO ENTREPRENEURSHIP
SUBJECT CODE :NME23ES

CREDITS : 2

TOTAL HOURS : 30

Unit 1: (5 hrs)

Nature of Entrepreneurship:

Meaning –Need for Entrepreneurship –Qualities of Successful Entrepreneurs - Myths of Entrepreneurship

Activity: Assignment, Discussion (2hrs)

Unit 2: (6 hrs)

Role of Entrepreneurs

Significance of Entrepreneurship to the nation –Environmental Factors influencing Entrepreneurship– Entrepreneurial Process and Functions - Challenges faced by Entrepreneurs

Activity: Quiz / Role Play (2hrs)

Unit 3: (6 hrs)

Formulation of Business Idea:

Business Idea Generation - Entrepreneurial Imagination and Creativity – Role of Innovation– Opportunity Evaluation

Activity: Business Idea Pitch (2hrs)

Unit 4: (6 hrs)

Business Planning:

Need for Market Study – Securing Finance from various Sources - Significance of Business plan– Components of Business plan

Activity: Schemes available for Entrepreneurs (2hrs)

Unit 5: (7 hrs) Project:

Interface with Successful Entrepreneurs – 4 hrs

Business Plan Presentation – 3 hrs

Exam Pattern for Introduction to Entrepreneurship

Quiz : 50 Marks

Assignment : 25 Marks

Project/Casestudy : 25 Marks

Total : 100 Marks

COURSE	COURSE NAME	Category	L	T	P	Credit
---------------	--------------------	-----------------	----------	----------	----------	---------------

CODE TH23C03	CORE III CALCULUS OF TRANSFORMS WITH SCILAB SEMESTER II	Theory	88	2	-	4
-------------------------	--	---------------	-----------	----------	----------	----------

Preamble

- To understand the practical applications of Integral transforms in solving problems of signal processing, differential and integral equations.
- To use SCILAB effectively to solve problems involving Integral transform.

Prerequisite

- Knowledge in differential and integral calculus

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Learn and acquire knowledge of Integral Transforms	K1
CLO2	Understand the concepts of Fourier, Laplace, Hankel and Mellin Transforms and the formation of difference equations	K2
CLO3	Solve difference equations using single step and multistep numerical methods	K3
CLO4	Demonstrate competency to solve differential and integral equations using the Fourier, Laplace, Hankel and Mellin Transforms	K4

Mapping with Programme Learning Outcomes

CLOS/PLOS	PLO1	PLO2	PLO3	PLO4	PLO5	PLO6	PLO7

CLO4.	S	S	S	S	S	S	S

S - Strong; M - Medium; L - Low

Syllabus

SEMESTER II - CORE PAPER III Calculus of Transforms with SCILAB

Credits: 4

Hours: 88

Subject Code: TH23C03

UNIT I

18 Hrs

Applications of Laplace Transforms: Introduction-Solutions of Ordinary Differential Equations-Partial Differential Equations, Initial and Boundary Value Problems-Solutions of Integral Equations-Solutions of Boundary Value Problems-Evaluations of Definite Integrals - Simple Problems using SCILAB.

UNIT II

18 Hrs

Fourier Transforms and Their Applications: Introduction-The Fourier Integral Formulas- Definition of the Fourier Transform and Examples-Fourier Transforms of Generalized Functions-Basic Properties of Fourier Transforms-Applications of Fourier Transforms to Ordinary Differential Equations-Solutions of Integral Equations-Solutions of Partial Differential Equations - Simple Problems using SCILAB.

UNIT III

17 Hrs

Hankel Transforms and Their Applications: Introduction-The Hankel Transform and Examples-Operational Properties of the Hankel Transform-Applications of Hankel Transforms to Partial Differential Equations.

UNIT IV

17 Hrs

Mellin Transforms and Their Applications: Introduction-Definition of the Mellin Transform and Examples-Basic Operational Properties of Mellin Transforms-Applications of Mellin Transforms-Application of Mellin Transforms to Summation of Series-Generalized Mellin Transforms.

UNIT V

18 Hrs

Difference Equations: Introduction-Order of Difference Equation-Degree of Difference Equation-Solution to Difference Equation-Formation of Difference Equations-Linear Difference Equations-Linear Homogeneous Difference Equations with Constant Coefficients-NonHomogeneous Linear Difference Equations with Constant Coefficients.

CODE TH23C04	CORE IV NUMBER THEORY AND SUMMATION OF SERIES WITH MAPLE SEMESTER II	Theory	73	2	-	4
-------------------------------	---	---------------	-----------	----------	----------	----------

Preamble

- To orient the students to learn about the real and complex number systems and also some of the basic notation of set theory.
- To enable the students to learn about the convergence and divergence of the series and develop problem solving skills.

Prerequisite

Knowledge in basic properties of the real numbers that lead to the formal development of real analysis and various methods in terms of convergence and divergences.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1.	Know the concept of convergence and limits that are applicable to sequences, series, differentiation and integration	K1
CLO2.	Determine the convergence or divergence of sequences and series	K2
CLO3.	Analyse the precise proofs of results that arise in the context of real analysis	K3
CLO4.	Apply convergence tests to infinite series	K4

Syllabus

SEMESTER II - CORE IV

NUMBER THEORY AND SUMMATION OF SERIES WITH MAPLE

Credits : 4

Hours: 73

Subject Code: TH23C04

UNIT I

15 hrs

The Real and Complex number systems: Introduction – The field axioms – The order axioms – Geometric representation of real numbers – intervals – integers- the unique factorization theorem for integers – rational numbers- irrational numbers – upper bounds, maximum element, least upper bound – the completeness axiom – some properties of supremum – properties of the

integers deduced from completeness axiom – the Archimedean property of the real number system – rational number with finite decimal representation – Finite decimal approximation to real numbers -infinite decimal representation of real numbers – Absolute values and the triangular inequality – The Cauchy – Schwarz inequality – Plus and minus infinity and the extended real number system \mathbf{R}^* - Complex numbers – Geometric representation of complex number – The imaginary unit – Absolute value of a complex number – Impossibility of ordering the complex numbers – Complex exponentials – Further properties of complex exponentials – The argument of a complex number – Integral powers and roots of complex numbers – complex logarithms – complex powers – Complex sines and cosines – Infinity and the extended complex plane \mathbf{C}^*

UNIT II

15 hrs

Some Basic Notations of Set theory: Introduction – Notations – Ordered pairs – Cartesian product of two sets – Relations and functions – Further terminology concerning functions – One – to – one functions and inverses – Composite functions – Sequences – Similar sets – Finite and infinite sets – Countable and uncountable sets – Uncountability of the real number system – set algebra – Countable collections of countable sets

UNIT III

15 hrs

Convergence and divergence of series: Definition of Infinite Series – Elementary results – Series of positive terms - Comparison tests – Cauchy’s condensation test – D’Alembert’s ratio test -Cauchy’s root test - Raabe’s test - Absolute convergence.

UNIT IV

16 hrs

Theory of Equations: Remainder Theorem - Roots of an Equation - Relations connecting the Roots and Coefficients - Symmetric function of roots - Transformations of equations – Reciprocal equations – Removal of terms – Transformations in General - Descarte’s rule of signs.

UNIT V

12 hrs

Rolle’s Theorem - Multiple roots – Strum’s theorem (statement only) –Strum’s functions Horner’s method.

COURSE CODE TH23A05	COURSE NAME MATHEMATICAL STATISTICS – II (Problems in Applied statistics using R)	Category	L	T	P	Credit
		Theory	88	2	-	5

Preamble

- To introduce statistical techniques of analysis and inference that are useful in many areas of scientific research.
- To present descriptive statistics and utilize the probability distributions to perform statistical inference.

Prerequisite

- Critically evaluate the design, including sampling techniques, of a statistical study,
- Effectively use statistical software R to perform statistical computations and display numerical and graphical summaries of data sets

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Construct and interpret deviations and proportions for populations,	K2
CLO2	Explain and successfully apply all aspects of parametric testing techniques including single and multi-sample tests for mean and proportion	K2
CLO3	Explain and successfully apply all aspects of appropriate non-parametric tests.	K3
CLO4	Understand, apply and compute maximum likelihood estimation	K4

Mapping with Programme Learning Outcomes

Syllabus

SEMESTER II – ALLIED – II

ALLIED – MATHEMATICAL STATISTICS - II

(Problems in Applied statistics using R)

Credits : 5

Subject Code : TH23A05

Hours: 86

UNIT I

17 hrs

Linear Regression - Introduction - Simple Linear Regression Model – Problems- Estimating the Regression Parameters-Error Random Variable- Prediction Intervals for Future Responses –problems- Coefficient of Determination- Sample Correlation Coefficient.

UNIT II

18 hrs

Testing Statistical Hypotheses - Introduction - Hypothesis Tests and Significance Levels- Problems - Tests Concerning the Mean of a Normal Population-Case of Known VarianceProblems - One-Sided Tests - The t Test for the Mean of a Normal Population-Case of Unknown Variance -- Hypothesis Tests Concerning Population Proportions- Two-Sided Tests of p . Hypothesis Tests Concerning Two Populations: Introduction- Testing Equality of Means of Two Normal- Populations: Case of Known Variances-Problems.

UNIT III

18 hrs

Testing Equality of Means: Unknown Variances and Large Sample Sizes-Problems - Testing Equality of Means: Small-Sample Tests when the Unknown Population Variances Are Equal- Paired-Sample t Test - Testing Equality of Population Proportions –Problems.Analysis of Variance - Introduction - One-Factor Analysis of Variance- Remark on the Degrees of Freedom - Two-Factor Analysis of Variance: Introduction and Parameter Estimation- Two-Factor Analysis of Variance: Testing Hypotheses.

UNIT IV

18 hrs

Chi-Square Goodness-of-Fit Tests- Introduction -- Chi-Squared Goodness-of-Fit Tests - Testing for Independence in Populations Classified According to Two Characteristics. Quality Control - Introduction - The \bar{X} Control Chart for Detecting a Shift in the Mean -Problems - When the Mean and Variance Are Unknown- S Control Charts – Problems - Control Charts for Fraction Defective .

UNIT V

17 hrs

Vital Statistics-Definition-Utility of vital statistics-Measures of population and Vital statistics- Introduction-Measures of population - Measures of vital statistics - Mortality Rates – Fertility Rates.

COURSE NUMBER 23PEPS1	COURSENAME I BSc Physics, Chemistry, Mathematics SEMESTER– II PROFESSIONAL ENGLISH FOR PHYSICAL SCIENCES	Category	L	T	P	Credit
			40	5		2

Objectives

- To develop the language skills of students by offering adequate practice in professional contexts.
- To enhance the lexical, grammatical and socio-linguistic and communicative competence of first year physical sciences students
- To focus on developing students' knowledge of domain specific registers and the required language skills.
- To develop strategic competence that will help in efficient communication
- To sharpen students' critical thinking skills and make students culturally aware of the target situation.

CourseOutcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recognise their own ability to improve their own competence in using the language	K1
CLO2	Use language for speaking with confidence in an intelligible and acceptable manner	K2
CLO3	Read independently unfamiliar texts with comprehension and understand the importance of reading for life	K3
CLO4	Understand the importance of writing in academic life	K3
CLO5	Write simple sentences without committing error of spelling or grammar	K3

(Outcomes based on guidelines in UGC LOCF – Generic Elective)

Syllabus

UNIT 1: COMMUNICATION

8 hours

Listening: Listening to audio text and answering question

Listening to Instructions

Speaking: Pair work and small group work.

Reading: Comprehension passages –Differentiate between facts and opinion

Writing: Developing a story with pictures.

Vocabulary: Register specific - Incorporated into the LSRW tasks

UNIT 2: DESCRIPTION

8 hours

Listening: Listening to process description.-Drawing a flow chart.

Speaking: Role play (formal context)

Reading: Skimming/Scanning- Reading passages on products, equipment and gadgets. **Writing:** Process Description –Compare and Contrast Paragraph-Sentence Definition and Extended definition- Free Writing.

Vocabulary: Register specific -Incorporated into the LSRW tasks.

UNIT 3: NEGOTIATION STRATEGIES

8 hours

Listening: Listening to interviews of specialists / Inventors in fields (Subject specific)

Speaking: Brainstorming. (Mind mapping).

Small group discussions (Subject- Specific) **Reading:** Longer Reading text.

Writing: Essay Writing (250 words)

Vocabulary: Register specific - Incorporated into the LSRW tasks

UNIT 4: PRESENTATION SKILLS

8 hours

Listening: Listening to lectures.

Speaking: Short talks.

Reading: Reading Comprehension passages

Writing:Writing Recommendations -Interpreting Visuals inputs

Vocabulary: Register specific - Incorporated into the LSRW tasks

UNIT 5: CRITICAL THINKING SKILLS

8 hours

Listening: Listening comprehension- Listening for information.

Speaking: Making presentations (with PPT- practice).

Reading : Comprehension passages –Note making.

Comprehension: Motivational article on Professional Competence, Professional Ethics and Life Skills)

Writing: Problem and Solution essay– Creative writing –Summary writing

Vocabulary: Register specific - Incorporated into the LSRW tasks

Numerical and Statistical Techniques

(Common to B.SC (CS), B.SC (CS with Cognitive Systems), BCA, B.SC (IT)- Semester I

Credits:5

Hours:88

Subject Code:TH23A03

- Unit I** **17 Hrs**
 Solution of Linear Simultaneous Equations: Gauss elimination - Gauss Jordan - Gauss Seidel and Gauss Jacobi methods - simple problems. Interpolation: Newton Forward and Backward Interpolation Formulae.
- Unit II** **17 Hrs**
 Numerical Differentiation, Formulae for Derivatives: Newton's Forward Difference - Newton's Backward Difference, Numerical Integration: Introduction, Newton-Cotes Quadrature formulas: trapezoidal rule, Simpson's 1/3 and 3/8 rules, Taylor's series method.
- Unit III** **18 Hrs**
 Skewness - Correlation analysis: Introduction - Significance of the study of correlation - correlation and causation - Types of correlation - Methods of studying correlation - Graphic method - Karl Pearson's coefficient of correlation - Coefficient of correlation and probable error - Coefficient of determination - Properties of the coefficient of the correlation - Rank correlation coefficient - Features of Spearman's correlation coefficient, Regression analysis.
- Unit IV** **17 Hrs**
 Probability: Introduction - probability defined - Importance of the concept of probability - Calculation of probability - Theorems of probability (statements only) –Mathematical expectation-Simple problems.
- Unit V** **19 Hrs**
 Theoretical Distributions: Binomial distribution - Poisson distribution and normal distribution (without derivations & proof).

- To enable the students to find the practical applications to the real-world problems.

Course Learning Outcomes

Upon the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CLO1	Recollect about several diverse examples of mathematics not in secondary school mathematics, problems using mathematics in unfamiliar settings, and explain why mathematical thinking is valuable in daily life based on the series and Mathematics of Finance.	K1
CLO2	Understand in analysing, solving, and computing real-world applications on the limits of Algebraic functions and simple differentiation	K2
CLO3	Apply the abilities to describe the concepts of simple integration and its application in business. Solve problems in a range of mathematical applications using the integral.	K3
CLO4	Analyse Linear Programming models for service and manufacturing systems, and apply operations research techniques and algorithms to solve these LP problems and transportation problems	K4

Syllabus

SEMESTER I

ALLIED - MATHEMATICS FOR COMMERCE

(COMMON TO SEMESTER I -B.COM (CA, E-COM, FS, A&F))

Credits: 4

Hours: 88

Subject Code: TH23A07

Unit I

17 Hrs

Arithmetic Progression - Geometric Progression. Simple Interest- Compound Interest - Annuities.

Unit II

18 Hrs

Differentiation: Introduction – Limits – Limits of a function – properties of limits – Standard limit theorems – Continuity – Properties of Continuous functions – Differentiation - Derivatives of x^n - Derivatives of e^x – Derivatives of $\log e^x$ – product rule – quotient rule – Function of a function rule – Logarithmic Differentiation – Differentiation of Implicit function – Relation between dy/dx and dx/dy – Parametric Differentiation – Successive Differentiation – Applications of Derivatives – Marginal cost – Marginal revenue – Elasticity – Relation between marginal revenue and elasticity of demand -. Maxima and minima – Point of inflexion (Excluding Trigonometric functions).

Unit III

18 Hrs

Integration : Arbitrary constant – Two general rules – Some standard results – Integration by Substitution – I – Integration by substitution - II - Integration by substitution – III – Standard results – Integration of rational function of the type – Integration by Partial fractions - Integration of the function of the type $1/((ax+b)\sqrt{lx^2+mx+n})$ – Integration by parts – Definite integral – properties of definite integrals – An Application of integration – Marginal cost – Total cost and average cost – Marginal revenue, Total revenue and Average revenue (Excluding Trigonometric functions).

Unit IV

17 Hrs

Linear Programming: Meaning and Formulation of LPP - Graphical Method - Simplex Method
Transportation problem: Mathematical formulation of the problem - Initial Basic feasible solution (Matrix Minima Method - North – West Corner rule and VAM)- Simple problems only.

Unit V

18 Hrs

Assignment Problem: Introduction- Mathematical formulation of assignment problem- Assignment algorithm- unbalanced Assignment model- maximization case in assignment problems-Travelling Salesman Problem-Simple problems only.

Textbooks

S. No	Author	Title of the book	Publishers	Year of Publication

Narmatha, Assistant Professor, Department of Mathematics

COURSE CODE TH23A15	COURSE NAME ALLIED STATISTICS I SEMESTER I	CATEGORY	L	T	P	CREDIT
		Theory	88	2	-	4

Preamble

- To present students the Basic concepts of statistics in terms of theory and practical.
- To enable the students to find the practical applications to the real world problems using EXCEL.

Course Learning Outcomes

Upon the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recall the basics concepts about collection and representation of data and Measures of central tendency	K1
CLO2	Perform statistical inference in several circumstances and interpret the results in an applied context.	K2
CLO3	Using Excel to gain proficiency skill for data analysis.	K3
CLO4	Distinguish types of studies and their limitations and strengths of Times Series and Index Numbers.	K4

Mapping with Programme Learning Outcomes

CLOs	PLO1	PLO2	PLO3	PLO4	PLO5
CLO1	S	M	S	M	S
CLO2	M	S	M	S	M
CLO3	S	M	S	M	S
CLO4	M	S	M	S	S

S- Strong; M-Medium; L-Low

SEMESTER I
ALLIED - STATISTICS I
(For B COM BUSINESS ANALYTICS)

Credits: 4**Hours: 88****Subject Code: TH23A15****UNIT I****16 Hrs**

Introduction-Meaning and objectives of Classification-Types of Classification-Formation of a discrete and continuous frequency Distribution-Tabulation of data- Parts of Table-General rules of tabulation- Types of tables. Diagrammatic and Graphic Presentation: Introduction- Significance of diagrams and graphs- General rules for constructing Diagrams-Types of diagrams- Graphs- Graphs of frequency distributions. Introduction to statistical software (like Excel) and learning graphs and diagrams using Excel.

UNIT II**19 Hrs**

Measures of central tendency: Introduction-Objectives of Averaging-Requisites of a good average-Types of Averages-Geometric Mean-Harmonic Mean- Relationship among the averages - Measures of dispersion: Significance of Measuring variation – Properties of good measures of variation-methods of studying variation. Simple problems related to above mentioned concepts using Excel.

UNIT III**18 Hrs**

Skewness: Introduction- Tests of skewness – Measures of skewness- Correlation analysis: Introduction - Significance of the study of correlation - correlation and causation - Types of correlation - Methods of studying correlation - Graphic method - Karl Pearson's coefficient of correlation - Coefficient of correlation and probable error - Coefficient of determination - Properties of the coefficient of the correlation - Rank correlation coefficient - Features of Spearman's correlation coefficient - Regression analysis.(Verification by excel)

UNIT IV**18 Hrs**

Analysis of time Series -Introduction - Utility of time series - Components of time series - Preliminary adjustments before analyzing time series - Measurement of trend - Free hand or graphic method - Method of semi averages - Moving average method - Measurement of seasonal variations - Method of simple averages only - Ratio-to-trend Method - Ratio-to - moving average method - Link relative method.

UNIT V**17 Hrs**

Index Numbers: Introduction - Uses of index numbers - Classification of index numbers - Problems in construction of index numbers - Methods of constructing index numbers - Quantity of volume index numbers - Value index numbers - Tests of adequacy of index number formulae. Interpolation: Introduction - Significance of interpolation and extrapolation - Assumptions of interpolation and extrapolation - Methods of interpolation: Binomial expansion methods - Newton's method - Lagrange's method- Extrapolation

COURSE CODE TH23A02	COURSE NAME	CATEGORY	L	T	P	CREDIT
	ALLIED -MATHEMATICS FOR MANAGEMENT I SEMESTER I	THEORY	73	2	-	4

Preamble

- To inspire the students to get the knowledge in basic mathematical concepts
- Introducing the need for mathematics to recognize appropriate investigate and interpretive procedures in management

Course Learning Outcomes

Upon the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recall the fundamental mathematical concepts and analysis of real-world problems to non-Mathematician	K1
CLO2	Understand the mathematical results to find solutions in the real life like annuities and sampling theory	K2
CLO3	Apply the fundamental mathematical concepts and analysis of real-world problems to non-Mathematician	K3
CLO4	Analyze mathematical statements and essential skills that are progressively developed throughout the curriculum.	K4

Syllabus

SEMESTER I

ALLIED - MATHEMATICS FOR MANAGEMENT I (Common to BBA(Aided), BBA (IB & RM), BBA (BPM))

Credits:4

Hours : 73

Subject Code:TH23A02

UNIT I

14 hrs

Arithmetic Progression-Geometric Progression-Matrices-Fundamental ideas about Matrices-operational Rules-Matrix Multiplication- Solving a system of linear equation by Cramer's rule and matrix inverse method, Inversion of Square Matrices of 3rd order, rank, simple problems.

UNIT II

14 hrs

Mathematics of Finance- Simple and Compound Interest, Depreciation, Annuities, Sinking Fund, Discount on Bills.

UNIT III

14 hrs

Meaning and scope, statistical survey, collection of data, classification and tabulation, diagrams and graphs. Introduction to statistical software (like Excel) and learning graphs and diagrams using Excel.

UNIT IV

16 hrs

Measure of central tendency, arithmetic mean, median and mode, geometric and harmonic mean. Measures of dispersion: Range, Quartile deviation, mean deviation, standard deviation, coefficient of variation. Correlation – rank correlation. Simple problems related to above mentioned concepts using Excel.

UNIT V

15 hrs

Analysis of Time Series: Components of Time Series- Secular Trend- Moving Average Method-Method of Least Squares- Seasonal Variation- Method of Simple Average. Index numbers: Weighted and unweighted indices, cost of living index.

COURSE CODE TH23A06	COURSE NAME ALLIED DISCRETE MATHEMATICS SEMESTER II	CATEGORY	L	T	P	CREDIT
		Theory	88	2	-	5

Preamble

Principle of Mathematical Structures which are essential and related to the concepts of Computer Science. This helps the students to approach any Mathematical Problem which arise in the field of Computer Science

Course Learning Outcomes

Upon the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Identify Mathematical logic and definitions and well-formed formula and Outline the understanding of Tautology and Equality relations thereby helps students to understand ambiguity and disagreement in real world problems	K1
CLO2	Lattices and Boolean algebras enables one to understand applications in logic, circuit theory, and probability	K2
CLO3	Demonstrate the importance of Graph Theory in Computer Science	K3
CLO4	Apply and Demonstrate algebraic concepts in Coding theory using group codes enhances their ability to detect and correct errors	K4

Syllabus**SEMESTER – II****ALLIED - DISCRETE MATHEMATICS****Common to B.SC (CS), B.SC (CS with Cognitive Systems), BCA, B.SC (IT)****Credits 5****Hours 88****Subject Code :TH23A06****Unit I 18Hrs**

Mathematical Logic: Connectives– Statement Formulas and Truth Tables - Conditional and Biconditional - Well formed Formulas - Tautologies - Equivalence of Formulas -Duality law Tautological implications - Normal forms –Theory of inference for the Statement Calculus - Predicate Calculus.

Unit II 17 Hrs

Coding Theory: Introduction – Hamming distance – Encoding a message – Group codes – Procedure for generating Group Codes – Decoding and Error Correction – An example of a Simple error correcting code.

Unit III 18 Hrs

Formal languages and Automata: Grammar and Languages -Phrase Structure grammar – Types of Phrase Structure Grammar – Backus-Naur form [BNF] - Finite State Acceptors and Regular Grammars : Deterministic finite automata-Non-Deterministic finite-State automataConversion of Non-Deterministic finite automata to finite state automata.

Unit IV 19 Hrs

Lattice and Boolean Algebra: Lattices as Partial ordering set – Some Properties of Lattices- Distributive lattices-Complemented Distributive Lattices-Boolean algebra – Boolean Function – Representation and Minimization of Boolean function using K-Map.

Unit V 16 Hrs

Graph Theory: Basic Concepts of Graph Theory – Path, Reachability and Connectedness – Circuits-Hamiltonian Paths- Euler paths-Matrix representation-Incidence matrix-Adjacency matrix-Tree and Binary tree – Theorems-Statement only(No Proof).

**SEMESTER II/IV Allied - Statistics for Commerce
B.COM (CA, E-COM, FS, A&F) - SEMESTER II****Credits 4****Hours 86****Subject Code : TH23A08****UNIT I****16Hrs**

Correlation analysis: Introduction - Significance of the study of correlation - correlation and causation - Types of correlation - Methods of studying correlation - Graphic method - Karl Pearson's coefficient of correlation - Coefficient of correlation and probable error -Regression analysis. Analysis of time Series: Introduction - Utility of time series - Components of time series - Preliminary adjustments before analysing time series - Measurement of trend - Free hand graphic method - Method of semi averages - Moving average method - Measurement of seasonal variations - Method of simple averages - ratio to moving average – link relative method.

UNIT II**19 Hrs**

Index Numbers: Introduction - Uses of index numbers - Classification of index numbers - problems in construction of index numbers - Methods of constructing index numbers - Quantity or volume index numbers - Value index numbers - Tests of adequacy of index number formulae- Consumer price index numbers-meaning and need-method of constructing the index- Index number of industrial production.

UNIT III**18 Hrs**

Concepts of probability- Addition theorem-Multiplicative theorem – Conditional probability-Bayes theorem-Mathematical Expectation-Theoretical distributions-Binomial Distribution -Poisson distribution-Normal distribution.

UNIT IV**17 Hrs**

Statistical Inference-Tests of hypothesis-Introduction—Procedure-Types of errors-Two-tailed and one-tailed tests of hypothesis-standard error and sampling distribution-Tests of significance for large samples-Difference between small and large samples- Two-tailed test and standard error of the difference between small and large samples-chi-square test and goodness of fit.

UNIT V**17 Hrs**

Vital Statistics-Definition-Utility of vital statistics-Measures of population and Vital statistics-Introduction-Measures of population - Measures of vital statistics - Mortality Rates – Fertility Rates.

COURSE CODE TH23A16	COURSE NAME ALLIED STATISTICS II SEMESTER II	CATEGORY	L	T	P	CREDIT
		ALLIED	88	2	-	4

Preamble

- To provide the use of mathematical process skills to identify, pose and solve problems creatively, critically and practically
- To make students to understand statistical principles with theoretical concepts and problems.
- To provide the wide knowledge of real time applications and to clear the competitive exams.

Course Learning Outcomes

Upon the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recall basic concepts of data description and its representation and understand the basic principles of probability and sampling theory	K1
CLO2	Understand the logic and framework of the inference of hypothesis testing.	K2
CLO3	Formulate and apply small samples, large sample and non-parametric tests in real life problems.	K3
CLO4	Apply probability as a tool for anticipating the distribution of data and using appropriate method to draw conclusions.	K4

Syllabus

SEMESTER II ALLIED – STATISTICS II (FOR B COM (BUSINESS ANALYTICS))

Credits: 4

Total Hours: 88

Subject Code: TH23A16

Unit I

18 Hrs Brief History- meaning & Usefulness-Mathematical

properties- permutation & Combination-Trail, event- sample space-mutually exclusive cases- exhaustive events-independent events-dependent events, simple and compound events- measurement-classical, relative frequency – theory of probability-limitations- personalistic view of probability and axiomatic approach of probability- addition and multiplication theorems.

Unit II

18 Hrs

Theoretical Distributions: Binomial Distributions - Poisson Distributions – Normal Distributions.

UNIT III

18 Hrs

Tests of hypotheses- Introduction- Standard error and Sampling Distribution-Estimation Test of significance for large samples- Test of significance for small samples: Students t distribution- chi-square test and goodness of fit (Except Yates correction). Simple problems using SPSS.

UNIT IV

17 Hrs

F test – Analysis of variance: One-way classification-two-way classification. Simple problems using SPSS.

UNIT V

17 Hrs

Experimental Design- Introduction-Randomized Block Design-Latin Squares-Randomized Blocks Vs Latin Squares-Latin cubes.

COURSE CODE TH23A24	COURSE NAME MATHEMATICS FOR MANAGEMENT II SEMESTER II	CATEGORY	L	T	P	CREDIT
		Theory	73	2	-	4

Preamble

To impart the students with knowledge in basic mathematical concepts.

Course Learning Outcomes

Upon the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Understand the basic concepts and application of operation research in various fields.	K1
CLO2	Understand and applying the managerial problems in industry so that they are able to use resources (capitals, materials, staffing, and machines) more effectively.	K2
CLO3	Formulate and solve the transportation problems using both manual methods and interpret the solutions.	K3
CLO4	Illustrate the theoretical framework to conceive social situations among competing players and produce optimal decision-making of independent and competing actors in a strategic setting.	K4

Mapping with Programme Learning Outcomes

Syllabus

SEMESTER II

MATHEMATICS FOR MANAGEMENT II Common to BBA (Aided), BBA (IB & RM), BBA (BPM)

Credits 4

Hours 73

Subject Code:TH23A24

UNIT I

14Hrs

Introduction to operation research: Meaning and Objective of OR – Scope of OR in Retail Business – Models in OR – Characteristics – Benefits – Limitations.

UNIT II

15 Hrs

Linear Programming: Meaning and Formulation of LPP - Graphical Method - Simplex Method.

UNIT III

15 Hrs

Transportation problem: Mathematical formulation of the problem - Initial Basic feasible solution (Matrix Minima Method - North – West Corner rule and VAM) - Moving towards optimality - Assignment problem - Travelling salesmen problem.

UNIT IV

14 Hrs

Game Theory: Useful Terminology - Rules for Game Theory - Pure Strategy - Mixed Strategy (2x2 games, 2 x n games or m x 2 games) - dominance property.

UNIT V

15 Hrs

Network Analysis: Network (Arrow diagram) Logic - Critical Path Method (CPM) - Programme Evaluation and Review Technique (PERT).

COURSE CODE TH32A26	COURSE NAME ALLIED – STATISTICS FOR COMPUTER SCIENCE I SEMESTER II	CATEGORY	L	T	P	CREDIT
		Theory	88	2	-	5

Preamble

- This course introduces the fundamental concepts of probability and random variables.
- It also provides knowledge in discrete and continuous distributions. It deals with various sampling distributions like t, F, chi-square distributions etc..

Course Learning Outcomes

Upon the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Demonstrate the basic concepts of statistics	K1
CLO2	Identify the methods for different measures of central tendency, dispersion	K2
CLO3	Indicate the strength and direction of a <i>linear</i> relationship between two variables, <i>regression and time series</i> .	K3
CLO4	Demonstrate advanced understanding of the concepts of time series	K4

Mapping with Programme Learning Outcomes

CLOs	PLO1	PLO2	PLO3	PLO4	PLO5	PLO6
CLO1	S	M	S	S	S	S
CLO2	S	S	M	S	S	S
CLO3	S	S	S	M	S	S
CLO4	S	S	S	S	M	S

S- Strong; M-Medium; L-Low

STATISTICS FOR COMPUTER SCIENCE I**Credits 5****Hours 88****Subject Code: TH23A26****UNIT I****17 hrs**

Introduction-Meaning and objectives of classification-Types of classification-Formation of a discrete and continuous frequency distribution-Tabulation of data- Parts of table- General rules of tabulation- Types of tables. Diagrams and graphs. Introduction to statistical software (like Excel) and learning graphs and diagrams using Excel.

UNIT II**19 hrs**

Measures of location or central tendency: Arithmetic mean, Median, Mode, Geometric mean, Harmonic mean. Partition values: Quartiles, Deciles and percentiles. Measures of dispersion: Mean deviation, Quartile deviation, Standard deviation, Coefficient of variation. Moments: measures of skewness, Kurtosis.

UNIT III**18 hrs**

Correlation analysis: Introduction - Significance of the study of correlation - correlation and causation - Types of correlation - Methods of studying correlation - Graphic method - Karl Pearson's coefficient of correlation - Coefficient of correlation and probable error - Coefficient of determination - Properties of the coefficient of the correlation - Rank correlation coefficient - Features of Spearman's correlation coefficient, Regression analysis.

UNIT IV**17 hrs**

Analysis of time Series -Introduction - Utility of time series - Components of time series - Preliminary adjustments before analyzing time series - Measurement of trend - Free hand graphic method - Method of semi averages - Moving average method - Measurement of seasonal variations - Method of simple averages only - Ratio-to-trend Method - Ratio-to - moving average method - Link relative method.

UNIT V**17 hrs**

Index Numbers: Introduction - Uses of index numbers - Classification of index numbers - Problems in construction of index numbers - Methods of constructing index numbers - Quantity of volume index numbers - Value index numbers - Tests of adequacy of index number formulae. Interpolation: Introduction - Significance of interpolation and extrapolation - Extrapolation - Assumptions of interpolation and extrapolation - Methods of interpolation - Binomial expansion methods - Newton's method - Lagrange's method.

COURSE CODE TH23A32	ALLIED – NUMBER THEORY AND LINEAR ALGEBRA SEMESTER II	CATEGORY	L	T	P	CREDIT
		Theory	88	2	-	5

Preamble

- This course introduces the fundamental concepts of Number Theory & Linear algebra. It also enable the students to find the practical applications to the real world problems.

Course Learning Outcomes

Upon the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Define and interpret the concepts of divisibility, induction and greatest common divisor	K1
CLO2	Formulate and prove conjectures about numeric patterns centered on number theory.	K2
CLO3	Develop the use of matrix algebra techniques which is needed by engineers for practical applications	K3
CLO4	Apply the concepts of vector spaces and Compute Eigen values and Eigen vectors and use them to diagonalizable matrices.	K4

NUMBER THEORY AND LINEAR ALGEBRA**Credits 5****Hours 88****Subject Code: TH23A32****UNIT I****17 hrs**

Mathematical induction - The binomial theorem - Early number theory-Division algorithm-The greatest common divisor

UNIT II**18 hrs**

Euclidean algorithm - The Diophantine equation $ax+by=c$ -Basic properties of congruence-linear congruence and the Chinese Remainder theorem

UNIT III**18 hrs**

Vector Arithmetic, Arithmetic of Matrices, Matrix Algebra, The Transpose and Inverse of a Matrix, Types of Solutions, The Inverse Matrix Method

UNIT IV**18 hrs**

Properties of Vectors, Further Properties of Vectors, Linear Independence, Basis and Spanning Set, Introduction to General Vector Spaces

UNIT V**17 hrs**

Determinant of a Matrix, Introduction to Eigen values and Eigenvectors, Properties of Eigen values and Eigenvectors, Diagonalization.

COURSE CODE	COURSE NAME	Category	L	T	P	Credit
TH23C05	CORE V ANALYTICAL GEOMETRY WITH GEOGEBRA	Core	43	2	-	3

Preamble

- To provide a comprehensive and clear description of geometrical objects.
- To introduce equations for various shapes used in physics and engineering.

Prerequisite

Knowledge in Basic vector algebra, trigonometric functions and identities

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recall and classify geometric shapes using correct mathematical language. Draw and label figures based on verbal descriptions.	K1
CLO2	Understanding various equations of Planes, Straight Line, Sphere, Cone, and Cylinder.	K2
CLO3	Applying theorems involving vertical angles, complementary angles, supplementary angles, transversals, internal angle measure in triangles, circles and tangent lines to circles and applying geometric concepts to solve problems.	K3
CLO4	Analyse transform from polar co-ordinate system to rectangular co-ordinate system and vice versa.	K4

Syllabus

SEMESTER III– COREPAPER V ANALYTICAL GEOMETRY WITH GEOGEBRA

Credits:3

Hours: 43

Subject Code : TH23C05

UNIT I

8 hrs

Polar Coordinates: Introduction - Definition of Polar Coordinates - Relation between Cartesian Coordinates and Polar Coordinates – Polar Equation of a Straight Line -Polar Equation of a Straight Line in Normal form – Circle – Polar equation of a Conic – Simple Problems using Geogebra

UNIT II

8hrs

Planes: Introduction – General Equation of a plane - General Equation of a plane passing through a given point -Equation of a plane in intercept form - Equation of a plane in Normal form– Angle between two planes – Perpendicular distance from a point on a plane – Plane passing through three given points - To find the Ratio in which the plane joining the points (x_1, y_1, z_1) and (x_2, y_2, z_2) is Divided by the Plane $aX+by+cz+d=0$ - Plane Passing through the intersection of two given planes – Equation of the planes which bisect the angle between two given planes – Condition for the Homogenous Equation of the Second Degree to Represent a pair of Planes- Illustrative examples – Simple Problems using Geogebra

UNIT III

9hrs

Straight Line: Introduction – Equation of a Straight Line in Symmetrical Form- Equation of a Straight Line Passing Through the Two Given Points - Equation of a Straight Line Determined by a pair of planes in Symmetrical Form – Angle between a Plane and a Line – Condition for a line to be parallel to a Plane – Condition for a line to lie on the plane - To find the Length of the Perpendicular from a Given Point on a Line– Coplanar Lines–Skew Lines–Equation of Two Non-intersecting Lines
Intersection of Three Planes – Conditions for Three Given Planes to form a Triangular Prism – Illustrative Examples – Simple Problems using Geogebra

UNIT IV

9hrs

Sphere: Definition of Sphere – The Equation of a Sphere with centre at (a,b,c) and radius r –Equation of a sphere on the Line Joining the points (x_1, y_1, z_1) and (x_2, y_2, z_2) as Diameter– Length of the Tangent from $P(x_1, y_1, z_1)$ the Sphere $x^2+y^2+z^2+2ux+2vy+2wz+d=0$ –Equation of the Tangent Plane at (x_1, y_1, z_1) to the Sphere $x^2 +y^2+z^2+2ux+2vy+2wz+d=0$ - Section of a Sphere by a Plane – Equation of a Circle – Intersection of Two Spheres – Equation of a Sphere Passing through a Given Circle – Condition for Orthogonality of Two Spheres–Radical Plane–Coaxal System–Illustrative Examples
Simple Problems using Geogebra.

UNIT V

9 hrs

Cone: Definition of Cone – Equation of a Cone with a given Vertex and a given guiding curve– Equation of a cone with its vertex at the origin – Condition for the General Equation of the Second Degree to Represent a Cone – Right Circular Cone – Tangent Plane – Reciprocal Cone.
Cylinder: Definition – Equation of a Cylinder with a Given Generator and a given guiding curve – Enveloping Cylinder – Right Circular Cylinder – Illustrative – Simple Problems using Geogebra.

--------	-------------	----------	---	---	---	--------

CODE						
TH23C06	CORE VI - STATICS WITH GNU-FISICA LAB	Theory	58	2	-	4

Preamble

- To promote conceptual understanding and problem-solving skills, the course contains many interactive elements.

Prerequisite

- Knowledge in forces acting at a point, rigid body, vector algebra and centre of gravity.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recall the basic principles and concepts of statics to develop real concepts	K1
CLO2	Understand the relation between constraints imposed by supportive forces and develop the ability to describe position, forces and moments. Select suitable reference coordinate axes, construct free body diagrams.	K2
CLO3	Apply knowledge of mathematics, physical sciences and an ability to recognize, formulate and solve engineering problems.	K3
CLO4	Analyse the properties (components, resultants and moments) of a force and force systems in 2D & 3D. Solve the properties (centroid, centre of gravity and moment of inertia) of areas, lines and volumes and apply the same properties in equilibrium problems. Gain ability to Apply the results from physical models to create real target systems	K4

**SEMESTER III – CORE PAPER VI
STATICS with GNU – FISICA Lab****Credits:4****Hours:58****Subject Code : TH23C06****UNIT I****11 Hrs**

Forces acting at a point: Resultant and components–Parallelogram of forces–Triangle of forces – Polygon of forces – Lami’s Theorem – An extended form of the parallelogram law of forces – Resolution of a force– Components of a force along two given directions – Theorem on Resolved parts – Resultant of any number of forces and coplanar forces acting at a point : Graphical and Analytical method – Condition of Equilibrium of any number of forces acting upon a particle- *Simple Problems using GNU -fisicaLab.*

UNIT II**12 Hrs**

Parallel Forces and Moments: Introduction – The resultant of two like, unlike and unequal parallel forces acting on a rigid body–Moment of a force–Physical significance and Geometrical representation of a moment – Varignon’s theorem of moments– Generalised theorem of moments. Couples: Definition – Equilibrium and Equivalence of two couples – couples in parallel planes – Representation of a couple by a vector - Resultant of a Couple and a Force- *Simple Problems using GNU -fisicaLab.*

UNIT III**11 Hrs**

Equilibrium of Three Forces Acting on a Rigid body : Rigid body subjected to any three forces – Three coplanar forces – Procedure to be followed in solving any statistical problem – Two Trigonometrical theorems. Coplanar forces: Introduction–Reduction of any number of coplanar forces– Condition and Alternative condition for a system of forces to reduce to a single force or to a couple – Change of the base point – Equation to the line of action of the resultant - *Simple Problems using GNU-fisica Lab.*

UNIT IV**12Hrs**

Friction: Introduction – Statical, Dynamical and limiting friction – coefficient of friction – Angle of friction– Cone of friction - Equilibrium of a particle on a rough inclined plane – Equilibrium of a body on a rough inclined plane under a force parallel to the plane – Equilibrium of a body on a rough inclined plane under any forces. Centre of gravity: Centre of Like Parallel Forces – Centre of mass or centre of Inertia – Distinction between centre of gravity and centre of mass – The centre of gravity of a body – Determination of uniqueness of the centre of gravity in simple cases–Centre of gravity by integration- *Simple Problems using GNU -fisicaLab.*

UNIT V**12 Hrs**

Stability of equilibrium: Stable, Unstable and Neutral equilibrium – Nature of equilibrium of a rigid body supported at one fixed point – conditions of stability for a body with one degree of freedom. Equilibrium of strings: Equation of the common catenary – Tension at any point–Geometricalpropertiesofthecommoncatenary-*SimpleProblemsusing GNU -fisicaLab.*

Course Code	Course Name	Category	L	T	P	Credit
CS23SBGP	SBS - Gen-AI	Theory	44	1	-	3

The objective of this course is to understand the breadth and depth of Generative Artificial

Intelligence (Gen AI) and to impart knowledge on its ethical implications, practical applications, and emerging trends.

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Understand the fundamental concepts and ethical considerations of Generative AI.	K2
CLO2	Apply AI principles in practical settings using basic AI tools and platforms	K3
CLO3	Develop advanced skills in specialized AI applications such as text analysis, natural language processing, and image recognition.	K3
CLO4	Explore emerging trends in AI, integrating advanced AI tools into diverse professional practices.	K4

S- Strong; M-Medium; L-Low.

SBS I: Gen-AI - CS23SBGP**(44 Hrs)****Unit I: Introduction to Gen AI****(9 hours)**

Understanding Gen AI: Definition and scope of Gen AI - Overview of its applications in various fields - Introduction to essential skills needed for Gen AI. Ethical Considerations: Discussion on ethical guidelines and responsible use of AI - Understanding the impact of AI on society and individuals.

Hands-on Activity: Exploring AI Tools

- Working with appropriate content creation Gen-AI tools to engage with Chat GPT to explore various subjects, simulate interviews, or create imaginative written content.
- Working with appropriate writing and rephrasing Gen-AI tools to drafting essays on designated topics and refining the content with improved clarity, coherence, and correctness.

Unit II: Basic AI Concepts**(8 hours)**

Introduction to AI: Basic concepts and terminology of artificial intelligence - Examples of AI in everyday life - Real-world examples of AI applications in different domains. Machine Learning Basics: Understanding the principles of machine learning - Overview of supervised and unsupervised learning.

Hands-on Activity: Simple AI Projects

- Working with appropriate educational content creation Gen-AI tools to generate quizzes and flashcards based on classroom material.
- Working with appropriate language learning Gen-AI tools to practice and enhance language skills through interactive exercises and games across multiple languages.

Unit III: AI in Practice**(9 hours)**

Text Analysis and Natural Language Processing (NLP): Introduction to NLP concepts and techniques - Hands-on exercises analyzing text data and extracting insights. Image Recognition and Processing: Basics of image recognition algorithms and techniques - AI Tools for Text and Image Processing

Hands-on Activity: Text and Image Projects

- Working with appropriate image processing Gen-AI tools to experiment with AI-generated images.
- Working with appropriate object recognition Gen-AI tools to identify various objects such as text, images, products, plants, animals, artworks, barcodes, and QR codes.

Unit IV: AI for Productivity and Creativity**(9 hours)**

AI-enhanced Productivity and creativity Tools: Overview of productivity and creativity tools enhanced with AI capabilities - Tips for integrating AI into daily tasks and workflows. AI and Jobs: Exploring how AI impacts jobs and industries - Discussion on opportunities and challenges - Exploration of AI-powered creative tools and applications.

Hands-on Activity: Productivity and Creativity

- Working with appropriate content creation Gen-AI tools to generate interactive videos / blog posts / art / drawing / music and storytelling experience.
- Working with appropriate resume generation Gen-AI tools to create professional resumes efficiently.

Unit V: Future of Gen AI and Final Project**(9 hours)**

Emerging Trends in Gen AI - Applications of Generative AI - Ethical and Societal Impact of Gen AI - Future Directions and Challenges - Case Studies in Generative AI.

Hands-on Activity: Trends in Gen AI

- Working with appropriate speech generation Gen-AI tools to customize synthetic speech for virtual assistance across different applications.
- Working with appropriate data analysis Gen-AI tools to perform data analysis, visualization, and predictive modeling tasks.
- Working with appropriate Gen-AI design tools to simplify the creation of visually appealing presentations.
- Working with appropriate website builder Gen-AI tools to develop professional websites with AI assistance.

Pedagogy:

Demonstration of AI Tools, Lectures and Case studies.

Course Designers:

1) Mrs. S. Ponmalar, Assistant Professor, Department of Computer science.

Evaluation pattern for Gen-AI

Quiz : 50 Marks (5 quizzes with each 10 marks)

Case study : 25 Marks

TH23A12	MATHEMATICS I	Theory - Allied	103	2	-	5
---------	---------------	-----------------	-----	---	---	---

Preamble

- To introduce the fundamentals concepts of vector calculus, matrices, Laplace transforms and tensors which acts as a tool for understanding basic theories in theoretical physics

Prerequisite

- Knowledge in basic concepts of calculus and matrices

Course Learning Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recall the knowledge of calculus, vectors, vector calculus and these basic mathematical structures which are essential in solving problems in various branches of Physics as well as in engineering.	K1
CLO2	Understanding mathematical tools like calculus, integration, series solution approach, special function and prepare the student to solve problems which model physical phenomena.	K2
CLO3	Apply problem-solving skills that are required to solve different types of Physics related problems with well-defined solutions.	K3
CLO4	Analyze and tackle open-ended problems that belong to the disciplinary area boundaries using mathematical equation risen out of it.	K4

S- Strong

Syllabus

SEMESTER III –ALLIED MATHEMATICS - I

UNIT I

21hrs

Vector Calculus: Scalar and vector point functions - Differentiation of vectors - Differential vector Operators - Directional derivative: Gradient, Divergence and curl - MAPLE Applications Stepwise Solutions of Vector Calculus.

UNIT II

20 Hrs

Integration for vectors: Line, Surface and Volume integrals - Theorems of Gauss, Green's and Stoke's (Statement only) - Verification of Simple problems - MAPLE Applications - Stoke's problem.

UNIT III

21Hrs

Laplace Transforms:Definition–Laplace Transform of e^{at} , $\cos at$, $\sin at$, $\cosh at$, $\sinh at$, t^n , n a positive integer – $L[f'(t)]$, $L[f''(t)]$,....., $L[f^{(n)}(t)]$ – Laplace transform of $e^{at}\cos bt$, $e^{at}\sin bt$ and $e^{a^2 t^2}$. Inverse Laplace transforms of standard functions. Solving differential equations of second order with constant coefficients using Laplace transform.

UNIT IV

20 Hrs

Matrices: Eigen values and Eigen vectors - Cayley Hamilton theorem (without proof) – Verification – Using this theorem finding the inverse of a matrix – Partition of matrices – Diagonalisation of matrices - Power of matrices.

UNIT V

21 Hrs

Tensor Analysis : Definition of Tensors – Contravariant - Covariant and mixed tensors -Addition and subtraction of Tensors-Summation convention-Symmetry and Axisymmetry Tensor - Contraction and direct product – Quotient Rule – MAPLE Application – Tensor Calculus with differential Geometry.

Text Books

S. No	Author	Title of the book	Publishers	Year & Edition
1	P.Kandasamy & K.Thilagavathy	Allied Mathematics Volume II (For Unit I &II)	S.Chand & company LTD –	2004 & First edition
2	T.K.Manicavachagam Pillai and S. Narayanan	Ancillary Mathematics (For Unit III & IV) Volume - I & Volume - II	S.Viswanathan (Printers and Publishers) Pvt. Ltd.	Vol. I - 2009 & Vol. II - 2008

2. Ms. A. Karpagam, Associate Professor, Department of Mathematics

COURSE CODE	COURSE NAME	Category	L	T	P	Credits
TH23A09	ALLIED – MATHEMATICS FOR SCIENCES I SEMESTER III	Theory	103	2	-	5

Preamble

- To inspire the students to use appropriate and relevant, fundamental and applied mathematical knowledge.
- To explore how Chemistry and Mathematics interact with other disciplines within industry and with wider society.

Prerequisite

- Knowledge in Calculus and Set theory.

Course Outcomes

On the successful completion of the course, students will be able to

CLO Number	CLO Statement	Knowledge Level
CLO1	Recall the important quantities associated with vector fields such as divergence, curl and scalar potential and concepts in matrices, set theory and equivalence relations	K1
CLO2	Understanding the various concepts of line integrals and Laplace transform of one variable through problems.	K2
CLO3	Applying fundamental theorem of line integrals, Green's theorem, Stoke's theorem and Divergence theorem to evaluate integrals	K3
CLO4	Demonstrate knowledge of basic concepts such as Abelian groups, normal subgroups, quotient groups, cyclic groups, permutation groups and group actions	K4

Syllabus

SEMESTER III ALLIED - MATHEMATICS FOR SCIENCES I

Credits:5
Hours:103
Subject Code :TH23A09

UNIT I **21Hrs**

Vector Calculus: Scalar and Vector point functions - Differentiation of vectors - Differential Operators - Directional derivative: Gradient - Divergence and curl - MAPLE Applications - Stepwise Solutions of Vector Calculus.

UNIT II **20Hrs**

Integration for vectors Line, surface and volume integrals - Theorems of Gauss, Green's and Stoke's (statements only) *Verification of MAPLE Applications* – Stoke's problem.

UNIT III **21Hrs**

Laplace Transforms: Definition–Laplace Transform of e^{at} , $\cos at$, $\sin at$, $\cosh at$, $\sinh at$, t^n , n is a positive integer– $L[f'(t)]$, $L[f''(t)]$, ..., $L[f^{(n)}(t)]$ – Laplace transform of $e^{at}\cos bt$, $e^{at}\sin bt$ and $e^{at}t^n$ – Inverse Laplace Transforms of standard functions– Solving differential equations of second order with constant coefficients using Laplace transform.

UNIT IV **20Hrs**

Matrices: Eigen values and eigen vectors–Cayley Hamilton theorem (without proof)– Verification – Finding the inverse of a matrix (Using Cayley Hamilton theorem).

UNIT V **21 Hrs**

Review of Set theory and equivalence relations – Group – Properties - Order of an element – Subgroups - Cyclic groups – Theorems – Permutation group - Symmetric group S_n .

COURSE CODE	COURSE NAME	CATEGORY	L	T	P	CREDITS
TH23A33	ALLIED- MATHEMATICS FOR COMMERCE SEMESTER - I	Theory	73	2	-	4

Preamble

- To present the basic concepts of Mathematics to the students.
- To enable the students to find the practical applications to the real-world problems.

Course Outcomes

Upon the successful completion of the course, students will be able to

CO Number	CO Statement	Knowledge Level
CLO1	Recollect about several diverse examples of mathematics not in secondary school mathematics, problems using mathematics in unfamiliar settings, and explain why mathematical thinking is valuable in daily life based on the series and Mathematics of Finance.	K1
CLO2	Understand in analyzing, solving, and computing real-world applications on the limits of Algebraic functions and simple differentiation	K2
CLO3	Apply the abilities to describe the concepts of simple integration and its application in business. Solve problems in a range of mathematical applications using the integral.	K3
CLO4	Analyze Linear Programming models for service and manufacturing systems, and apply operations research techniques and algorithms to solve these LPP problems and transportation problems	K4

Syllabus

**SEMESTER III
ALLIED - MATHEMATICS FOR
COMMERCE
B. Com (Aided and SF)**

**Credits:4
Subject Code: TH23A33**

Hours:73

Unit I **13 Hrs**

Simple Interest- Compound Interest- Annuities.

Unit II **15Hrs**

Differentiation: Introduction – Limits – Limits of a function – properties of limits – Standard limit theorems – Continuity – Properties of Continuous functions – Differentiation - Derivatives of x^n - Derivatives of e^x – Derivatives of $\log e^x$ – product rule – quotient rule – Applications of Derivatives – Marginal cost – Marginal revenue – Elasticity – Relation between marginal revenue and elasticity of demand -. Maxima and minima – Point of inflexion (Excluding Trigonometric functions).

Unit III **15Hrs**

Integration: Arbitrary constant – Two general rules – Some standard results – Integration by Substitution – I – Integration by substitution - II - Integration by Partial fractions - Integration by parts – Definite integral – properties of definite integrals (problems only) – An Application of integration – Marginal cost – Total cost and average cost – Marginal revenue, Total revenue and Average revenue (Excluding Trigonometric functions).

Unit IV **15 Hrs**

Linear Programming: Meaning and Formulation of LPP - Graphical Method - Simplex Method - Transportation problem: Mathematical formulation of the problem - Initial Basic feasible solution (Matrix Minima Method - North – West Corner rule and VAM)- Simple problems only.

Unit V **13 Hrs**

Assignment Problem: Introduction- Mathematical formulation of assignment problem- Assignment algorithm- unbalanced Assignment model- maximization case in assignment problems-Simple problems only.

Text books

S. No	Author	Title of the book	Publishers	Year & Edition
1.	P.R. Vittal	Business Mathematics and Statistics	Margham Publications	2002
	UNIT I: Chapter -8,9 &10 UNIT -II: Chapter -15 (P.No.-236-258, 304-328) (Excluding Trigonometric functions) UNIT -III: Chapter -16 (P.No.-337-354, 363-396) (Excluding Trigonometric functions)			
2.	V. Sunderesan, K.S. Ganapathy Subramaniam, K. Ganesan	Operations research	A.R. Publications, 3rd Edition	2005

UNIT IV: Chapter 2 Section: 2.1 -2.8, Chapter - 3 : Section: 3.1.1 -3.1.4 ,
Chapter 5 - Section :5.1
UNIT V: Chapter 6 section 6.1-6.7
